What this standard covers

This standard specifies the terms and definitions, overall requirements, planning, implementation and control, performance evaluation, management review and continuous improvement of green supply chain management for household and similar electrical appliances (hereinafter referred to as "household appliances"). This standard applies to the green supply chain management of household appliances manufacturers, and its related upstream and downstream objects: suppliers, logistics providers, sellers, after-sales service providers, recyclers, and processing companies. Other products can also be used as reference.
