Foreword

QB/T 5633.13-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

Classification: ICS 67.180.20; CCS X69.

1 Scope

QB/T 5633.13-2026 is Part 13 of the series on amino acids, their salts and analogues, and it covers beta-alanine. Beta-alanine is one of the amino acids, and the document treats it as a single product within the series, which gives each substance its own part. It is a product standard issued under the Ministry of Industry and Information Technology. The text keeps to the substance named in its title and does not extend to other amino acids, which are dealt with in the other parts.

Producers of amino acids, food and feed ingredient companies, importers, buyers and analytical laboratories would refer to it. It is a voluntary standard, as the /T in the code indicates. It was issued on 13 February 2026 and takes effect on 1 September 2026. It is a new document and does not replace an earlier edition, so buyers who deal in this substance will meet it for the first time in this version.
