### What this standard covers

This standard specifies the terms and definitions, mode determination and power measurement, standby power classification, test report and evaluation requirements for household and similar electrical appliances. This standard applies to the judgment, classification and evaluation of the shutdown and standby modes of household and similar electrical appliances with independent existence of "shutdown mode" and "standby mode".  
Note: "Household and similar electrical appliances" in this standard refers to household and similar electrical appliances covered by GB 4706 series standards.
