What this standard covers

This standard specifies the requirements, test methods, inspection rules, labels, signs, packaging, transportation and storage of ion exchange resin regenerant sodium chloride. This standard is applicable to salt products (commonly known as soft water salt) that use edible salt as raw material and are made by physical pressing and are regenerated with sodium sulfonate ion exchange resins for softening domestic water. The salt products used for the regeneration of sodium sulfonate ion exchange resins for softening industrial water can be implemented by reference.
