What this standard covers

This standard stipulates the requirements, classification and model designation, inspection rules, marking, packaging, transportation and storage of electrothermal actuators, specifies the corresponding test methods, and specifies related terms and definitions. This standard applies to the design, production and inspection of electrothermal actuators installed on small-diameter electric valves of DN50 and below, sub-collector branches, balance valves and radiator thermostatic control valves. This standard applies to electrothermal actuators whose DC voltage does not exceed 50V and AC voltage does not exceed 250V.
