What this standard covers

This standard specifies the determination of the content of magnolol and honokiol in toothpaste by high performance liquid chromatography, including: principle, reagents and materials, instruments and equipment, analysis steps, result calculation, detection limit and quantification limit, recovery The rate and precision, allowable difference, and the molecular formula, structural formula and relative molecular mass information of magnolol and honokiol are given. This document is applicable to the determination of the content of magnolol and honokiol in toothpaste of oral care products by high performance liquid chromatography.

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): Y43.

Estimated length of the Chinese original: 9,940 words.
