What this standard covers

This standard specifies the requirements, inspection rules, marking, packaging, transportation and storage of hot and cold press setting machines, provides classifications, and describes the model preparation method and corresponding test methods. This standard applies to the production, inspection and sale of setting machines in the shoemaking industry that obtain the required shape of shoe parts through pressure and/or heating (cooling) methods. This standard does not apply to machines for pressure forming soles.

Document data

International classification (ICS): 61.080.

Chinese classification (CCS): Y99.

Estimated length of the Chinese original: 8,816 words.
