What this standard covers

This standard specifies the composition, basic parameters and working conditions, requirements, inspection rules, marking, packaging, transportation and storage of a six-axis CNC multifunctional bag and bag processing machine, describes the model preparation method and corresponding test methods, and defines relevant terms and definition. This standard applies to the production, inspection and sales of six-axis CNC multi-function luggage processing machines that perform multiple types of processing such as milling, drilling, and trimming of box shells.

Document data

International classification (ICS): 61.080.

Chinese classification (CCS): Y99.

Estimated length of the Chinese original: 10,196 words.
