What this standard covers

This standard specifies the requirements, inspection rules, marking, packaging, transportation and storage of commercial warm water boilers, describes the corresponding test methods, and defines relevant terms and definitions. This standard applies to the design, production, inspection and sales of commercial warm water boilers that are not exclusively for household use and are suitable for single-phase appliances with a rated voltage not exceeding 250V and other appliances with a rated voltage not exceeding 480V. Warm water machines that utilize other forms of energy can be used as a reference. This standard does not apply to: - Warm water machines specially designed for industrial use; - Warm water machines with electrode heaters; - Warm water machines with refrigeration function; - In the presence of corrosive or explosive gases (A warm water machine used under special conditions such as dust, steam or combustible gas).
