What this standard covers

This standard specifies the physical and mechanical properties, combustion performance, harmful substance limits, formaldehyde release levels, mildew resistance and other requirements for rigid polyvinyl chloride low-foaming cabinets and bathroom cabinet panels, and describes the corresponding sample preparation and sample status. Regulation and test methods stipulate inspection rules, marking, packaging, transportation and storage, etc., and also provide classifications to facilitate technical regulations. This standard applies to the production, inspection and sales of boards made from polyvinyl chloride resin and appropriate additives through extrusion foaming process.

Document data

International classification (ICS): 83.140.99.

Chinese classification (CCS): Y28.

Estimated length of the Chinese original: 10,175 words.
