What this standard covers

This standard stipulates the requirements for purine content of low-purine foods, describes the corresponding test methods, and stipulates labeling and labeling requirements. This standard applies to the production, research and development, processing and circulation of prepackaged foods with purine content not higher than 50.00mg/100g. This standard does not apply to the production, research and development, processing and distribution of foods that are medically clear to be unfavorable for purine control.
