What this standard covers

This standard stipulates the requirements for energy efficiency levels, energy efficiency limit values and markings of household fresh air fans, and describes the corresponding test methods. This standard is applicable to the energy efficiency rating assessment of household fresh air fans with rated voltages of single-phase appliances not exceeding 250V and rated voltages of other appliances not exceeding 480V. The building's centralized fresh air system and the unpowered purification system installed in the fresh air duct can be used as a reference.

Document data

International classification (ICS): 97.030.
