What this standard covers

This standard specifies the requirements for materials, structure and connection methods, color, appearance, size, physical and mechanical properties of continuous spiral meshing steel-plastic composite pipes, describes the corresponding test methods, and specifies inspection rules, marking, packaging, transportation and storage Content. This standard applies to the production, inspection and sales of buried drainage and sewage pipes with long-term operating temperatures below 45??C. After considering the chemical resistance and temperature resistance evaluation of the material, it is also suitable for the production, inspection and sales of industrial buried drainage and sewage pipes.

Document data

International classification (ICS): 83.140.30.

Chinese classification (CCS): G33.

Estimated length of the Chinese original: 18,174 words.
