What this standard covers

This standard specifies the terms and definitions, symbols and abbreviations, product classifications, markings, connection methods and structural types, materials and requirements for polyolefin structural wall headers for rainwater collection. It describes the corresponding test methods and stipulates inspection Regulations, markings, transport and storage content. This standard applies to the production, inspection and sales of soakaway headers for rainwater collection in sponge cities and other areas. It is also suitable for the production, inspection and sales of seepage headers for rainwater and biogas collection in landfills.

Document data

International classification (ICS): 83.140.30.

Chinese classification (CCS): G33.

Estimated length of the Chinese original: 16,176 words.
