What this standard covers

This standard stipulates the technical performance indicators of high-temperature water-based printing inks for polyvinyl chloride film veneers and the requirements for the maximum limits of harmful soluble elements. It describes the corresponding test methods and stipulates inspection rules, marking, packaging, transportation, and storage contents. This standard applies to the production, inspection and sales of foamed polyvinyl chloride film veneer and high temperature resistant water-based gravure printing ink.

Document data

International classification (ICS): 87.080.

Chinese classification (CCS): A17.

Estimated length of the Chinese original: 11,151 words.
