What this standard covers

This standard specifies the classification, specifications, dimensions and deviations, appearance, physical and mechanical properties, combustion performance and harmful substance limits of recycled plastic composite boards for printed circuit boards, describes the standard environment for sample state adjustment and testing and the corresponding test methods, and specifies the inspection rules, markings, packaging, transportation and storage contents. This standard applies to the production, inspection and sale of building decorative boards and indoor floor paving floors made of non-metallic powders after metal separation from recycled printed circuit boards, thermosetting resins and additives through high-temperature molding, and substrates through finishing.

Document data

International classification (ICS): 83.140.10.

Chinese classification (CCS): Y28.

Estimated length of the Chinese original: 16,179 words.
