What this standard covers

This standard specifies the relevant requirements for the design of vacuum salt production plants. This standard applies to the engineering design of new construction, expansion, reconstruction and technical transformation of vacuum salt making plants (including by-product sodium sulfate, etc., excluding mining areas, living areas and comprehensive utilization projects). The engineering design of projects with similar material properties such as salty wastewater and sodium sulfate can also be implemented with reference.

Document data

International classification (ICS): 71.06.

Chinese classification (CCS): P34.

Estimated length of the Chinese original: 54,510 words.
