Foreword

QB/T 6502-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

Classification: ICS 67.120.30; CCS X20.

1 Scope

QB/T 6502-2026 concerns dried fish meat floss, a food product made from fish meat and sold in a dried, fluffy form. It is a product standard, and the document deals with this one food. It does not extend to meat floss made from other animals or to other fish products, which are outside the subject of the title. Producers and buyers can use it as the common reference for the product when a delivery is agreed or inspected.

Food manufacturers, seafood processors, wholesalers, retailers, importers and food testing laboratories would refer to it. It is a voluntary standard, as the /T in the code shows. The Ministry of Industry and Information Technology issued it on 13 February 2026, and it takes effect on 1 September 2026. It is a new document and does not replace an earlier edition.
