What this standard covers

This standard specifies the structural requirements, performance indicators and technical requirements, test methods and performance grade assessment of electric heating furnaces. This standard applies to the production, inspection and evaluation of electric heating furnaces for household and similar purposes, where the voltage of single-phase appliances does not exceed 250V and other appliances does not exceed 480V, and the electric heating furnaces are intended to heat water to a temperature below the boiling point. This standard does not apply to: the rear heat dissipation system and pressure vessels of electric heating furnaces.

Document data

International classification (ICS): 97.100.10.

Chinese classification (CCS): Y63.

Estimated length of the Chinese original: 13,141 words.
