What this standard covers

This standard specifies the requirements for safety, cleaning performance, dehydration performance, drying performance, unit water consumption, unit power consumption, sterilization performance, deodorization performance, and hair bundle fastening performance of electric shoe washing machines and shoe washing and drying machines for household and similar purposes, describes the corresponding test methods, specifies the inspection rules, marking, packaging, transportation and storage, and gives product classifications that are convenient for technical regulations. This standard applies to the production, inspection and sales of shoe washing machines and shoe washing and drying machines for use in households and similar occasions, with an AC single-phase rated voltage not exceeding 250V. The production, inspection and sales of other appliances with shoe washing and shoe washing and drying functions are used as a reference. This standard does not apply to the production, inspection and sales of appliances with only shoe drying functions.
