What this standard covers

This standard specifies the test methods and evaluation requirements for the comfort of indoor heaters. This standard applies to the comfort test and evaluation of indoor heaters used in homes and similar places with a rated voltage of no more than 250V for single-phase appliances and no more than 480V for other appliances. This standard does not apply to: wallpaper, blankets, curtains or tubes equipped with soft electric heating elements, household heat storage indoor heaters, bathroom electric heaters (yuba), table heaters and visible scorching radiant heaters.
