What this standard covers

This standard specifies the requirements for surface disinfection devices based on ultraviolet rays and ultraviolet photocatalysis, describes the corresponding test methods, specifies the inspection rules, marking and packaging, transportation and storage, and the contents of the instruction manual. This standard applies to the design, production testing, sales and use of hard surface continuous disinfection devices based on UV-C ultraviolet radiation sources with a wavelength of 200nm to 280nm.

Document data

International classification (ICS): 13.020.40.

Chinese classification (CCS): Z05.

Estimated length of the Chinese original: 20,277 words.
