What this standard covers

This standard specifies the appearance quality, capacity deviation, box size deviation, internal stress, sealing performance, microwave resistance, box body heat shock resistance, etc. of heat-resistant glass fresh-keeping boxes, describes the corresponding test methods, specifies inspection rules, marking, packaging, transportation and storage, and gives classifications that are convenient for technical regulations. This standard applies to the design, production, inspection and sales of heat-resistant glass fresh-keeping boxes with high borosilicate glass materials as the box body.

Document data

International classification (ICS): 81.040.30.

Chinese classification (CCS): Y22.

Estimated length of the Chinese original: 12,118 words.
