What this standard covers

This standard specifies the bead appearance, bead density classification, and hardness of thermoplastic polyurethane foam beads, describes the corresponding test methods, specifies inspection rules, marking, packaging, transportation and storage, and gives classifications that are convenient for technical regulations. This standard applies to the production, inspection and sales of thermoplastic polyurethane foam beads synthesized from thermoplastic polyurethane granules with polyols and isocyanates as the main raw materials and obtained by supercritical foaming process.

Document data

International classification (ICS): 83.100.

Chinese classification (CCS): G32.

Estimated length of the Chinese original: 9,947 words.
