What this standard covers

This standard specifies the appearance, size and other requirements of polyurethane adsorption pads for polishing electronic display screens, describes the corresponding test methods, specifies the inspection rules, marking, packaging, transportation and storage, and provides product structures and models for easy technical regulations. This standard applies to the production, inspection and sales of composite materials composed of sheets and adhesive layers made of thermoplastic polyurethane as the main raw material, adding surfactants and other auxiliary materials, and made by foaming, grinding and other processes.

Document data

International classification (ICS): 83.100.

Chinese classification (CCS): Y28.

Estimated length of the Chinese original: 8,872 words.
