### What this standard covers

This standard specifies the method for testing the inner wall corrosion of food metal containers using scanning electron microscopes and energy spectrometers, including principles, reagents and materials, instruments and equipment, sample preparation, test steps, result description and test report. This standard applies to the determination of the inner wall corrosion of food metal containers (including metal lids).

### Document data

International classification (ICS): 67.250.

Chinese classification (CCS): A82.

Estimated length of the Chinese original: 11,199 words.
