What this standard covers

This standard specifies the requirements for materials and components, fresh-keeping performance, refrigeration performance, sealing performance, wine separation accuracy, noise, daily power consumption, and appearance of wine preservation and wine dispensing machines, describes the corresponding test conditions and test methods, specifies inspection rules, markings, instructions for use, packaging, transportation and storage, and gives classifications and names that are convenient for technical regulations. This standard applies to the design, production, sales, transportation, storage, use, quality inspection, etc. of wine preservation dispensers for household and similar purposes. It can be used as a reference for other household electrical appliances that have the function of preserving wine after opening the bottle (such as refrigerators and wine cabinets with wine preservation function).

Document data

International classification (ICS): 97.030.

Chinese classification (CCS): Y61.

Estimated length of the Chinese original: 21,251 words.
