What this standard covers

This standard specifies the accuracy, repeatability, consistency, zero drift, range drift, response time, and anti-interference of air quality detection devices for household and similar electrical appliances, describes the corresponding test methods, specifies marking, packaging, transportation and storage, and provides product classifications that facilitate technical regulations. This standard applies to air quality detection devices used alone in family rooms and similar places, as well as detection devices installed inside or outside household electrical appliances such as air purifiers, fresh air fans, air conditioners, humidifiers, etc. Air quality detection devices of other products can be used as a reference.
