What this standard covers

This standard specifies the requirements for normal operating environment, materials, electrical safety, and water output deviation for phase change energy storage electric water heaters for domestic and similar uses. It describes the corresponding test methods, specifies inspection rules, and outlines the marking, packaging, transportation, and storage procedures. A classification system for ease of technical specification is provided. This document applies to the design, production, inspection, and sale of phase change energy storage electric water heaters for domestic and similar uses.

Document data

International classification (ICS): 97.100.10.

Chinese classification (CCS): Y63.

Estimated length of the Chinese original: 10,160 words.
