What this standard covers

This standard specifies the main dimensions and deviations, shape and position tolerances, moisture content of wood and engineered wood, appearance, structure, physicochemical properties, mechanical properties, flammability, limits of hazardous substances, and safety requirements for charging devices of public seating in transportation waiting rooms. It describes the corresponding test methods, specifies inspection rules, marking, instructions for use, packaging, transportation, and storage, and provides product classifications for ease of technical specification, defining relevant terminology. This document applies to the design, production, inspection, and sale of public seating used indoors in transportation waiting rooms such as airports, train stations, bus stations, and docks. This document does not apply to high chairs such as massage chairs and bar stools with massage or heating functions used indoors in transportation waiting rooms such as airports, train stations, bus stations, and docks.
