What this standard covers

This standard specifies the processing and assembly, installation, mechanical and electrical safety, appearance, no-load operation, and performance requirements for double-wire filter press wet pulp machines. It describes the corresponding test methods, specifies inspection rules, marking, packaging, transportation, and storage, and provides product classifications for ease of technical specification, defining relevant terminology. This document applies to the design, manufacture, inspection, and acceptance of double-wire filter press wet pulp machines in the pulp and paper industry; it can be used as a reference for the design, manufacture, inspection, and acceptance of products in other similar industries.

Document data

International classification (ICS): 85.100.

Chinese classification (CCS): Y91.

Estimated length of the Chinese original: 10,169 words.
