What this standard covers

This standard specifies the requirements for assembly quality, appearance, electrical safety, safety protection, and performance of corrugated cardboard box production lines. It describes the corresponding test methods, specifies inspection rules, marking, packaging, transportation, and storage, and provides the composition, type, and basic parameters for ease of technical specification. It also defines relevant terminology. This document applies to the design, manufacture, inspection, and sale of production lines that complete the processes of feeding, printing, creasing, slotting, die-cutting, and automatic folding and gluing of corrugated cardboard.

Document data

International classification (ICS): 85.100.

Chinese classification (CCS): Y91.

Estimated length of the Chinese original: 12,144 words.
