What this standard covers

This standard specifies the sealing performance and heat transfer performance requirements for heat pipe cooling devices used in room air conditioner power devices, describes the corresponding test methods, and specifies inspection rules, packaging, marking, transportation, and storage. This document applies to the design, production, inspection, and sale of heat pipe cooling devices for room air conditioner power devices with a heat source temperature not exceeding 120°C and a non-flammable heat transfer medium.

Document data

International classification (ICS): 97.040.30.

Chinese classification (CCS): Y61.

Estimated length of the Chinese original: 18,138 words.
