What this standard covers

This standard specifies the technical indicators, solvent composition, and maximum limits of harmful soluble elements for single-solvent gravure general-purpose plastic composite inks. It describes the corresponding test methods and specifies the inspection rules, marking, packaging, transportation, and storage. This document applies to the production, inspection, and sale of single-solvent general-purpose plastic composite inks printed on treated biaxially oriented polypropylene, polyester, nylon, and other plastic films using gravure printing.

Document data

International classification (ICS): 87.080.

Chinese classification (CCS): A17.

Estimated length of the Chinese original: 7,734 words.
