Foreword

QB/T 8180-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

Classification: ICS 67.040; CCS X60.

1 Scope

QB/T 8180-2026 covers miniang, the fermented rice food for eating that is also known as edible rice wine, laozao or juniang. It is a product standard and deals with this traditional fermented rice product. The document keeps to the food described by these names and does not take in alcoholic rice wines made as beverages, which are outside the title.

Producers of fermented rice foods, food companies, caterers, retailers, importers, buyers and food testing laboratories would refer to it. It is a voluntary standard, as the /T in the code shows. The Ministry of Industry and Information Technology issued it on 13 February 2026, and it takes effect on 1 September 2026. It is a new document and does not replace an earlier edition, so readers who deal in this product will meet it for the first time in this version.
