Foreword

QB/T 8194-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

Classification: ICS 59.140.35; CCS Y48.

1 Scope

QB/T 8194-2026 covers leather and fur caps, the headwear made from leather or fur. It is a product standard, and the document deals with this type of cap. It stays with the caps themselves and does not reach other leather or fur articles, such as garments or gloves. Manufacturers and buyers can use it as the common reference for these caps when a delivery is agreed or checked.

Cap and fur garment manufacturers, leather processors, wholesalers, retailers, importers and testing laboratories would refer to it. It is a voluntary standard, as the /T in the code shows. The Ministry of Industry and Information Technology issued it on 13 February 2026, and it takes effect on 1 September 2026. It is a new document and does not replace an earlier edition.
