Foreword

QB/T 8207-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

Classification: ICS 67.040; CCS X69.

1 Scope

QB/T 8207-2026 is the light industry standard for seaweed protein, a protein material obtained from seaweed. The document treats seaweed protein as a product and sets out the technical provisions that apply to it, so that producers and buyers can describe and assess the material by reference to one published text.

It will be used by producers of seaweed protein, by food, feed and ingredient manufacturers that buy it, by testing laboratories and quality control bodies, and by purchasers who need an agreed technical basis for trade. The standard is voluntary, as the /T in the code indicates, and applies where a contract, a customer or another rule refers to it. The Ministry of Industry and Information Technology approved and issued it on 13 February 2026, and it comes into effect on 1 September 2026. It is a new document and does not replace an earlier edition.
