Foreword

QB/T 8208-2026 is a recommended industry standard of the People's Republic of China in the Light Industry sector, approved and issued by the Ministry of Industry and Information Technology on 13 February 2026, with effect from 1 September 2026.

Classification: ICS 67.040; CCS X69.

1 Scope

QB/T 8208-2026 is the light industry standard for seaweed polysaccharides, the carbohydrate materials extracted from seaweed. The document treats seaweed polysaccharides as a product and sets out the technical provisions that apply to the material, so that producers and buyers can describe and assess it by reference to one published text.

It will be used by producers of seaweed polysaccharides, by manufacturers in food, daily-use and related industries that buy the material as an ingredient, by testing laboratories and quality control bodies, and by purchasers who want an agreed technical basis for supply contracts. The standard is voluntary, as the /T in its code shows, and applies where a contract, a customer or another rule refers to it. The Ministry of Industry and Information Technology approved and issued it on 13 February 2026, and it takes effect on 1 September 2026. It is a new document and does not replace an earlier edition.
