What this standard covers

This standard specifies the type, dimensions, technical requirements, and product number of hexagonal flange self-discharging grounding bolts with a nominal thread diameter $d=6\text{mm}\sim 10\text{mm}$. This standard applies to grounding connection points in automotive all-steel structures, such as automotive powertrain grounding harnesses, capacitor grounding harnesses, instrument panel grounding harnesses, and other automotive electrical system components.

Document data

International classification (ICS): 43.040.

Chinese classification (CCS): T31.

Estimated length of the Chinese original: 12,116 words.
