Foreword

QC/T 35-2026 is a recommended industry standard of the People's Republic of China in the Automotive sector, approved and issued by the Ministry of Industry and Information Technology on 16 April 2026, with effect from 1 November 2026.

This edition replaces QC/T 35-2015.

Classification: ICS 43.040.40; CCS T24.

1 Scope

QC/T 35-2026 gives specifications and bench test methods for pneumatic control equipment used on motor vehicles and trailers. Pneumatic control equipment is the group of valves and devices that regulate compressed air in a vehicle air brake system. The document covers the requirements for this equipment and the methods used to test it on a bench.

The standard is used by manufacturers of air brake components, vehicle and trailer makers that specify and buy them, and test laboratories. It is a voluntary standard, as the /T in its code shows. It was approved by the Ministry of Industry and Information Technology, issued on 16 April 2026 and takes effect on 1 November 2026. It replaces QC/T 35-2015.
