What this standard covers

This standard specifies the technical requirements, test methods, inspection rules, marking, packaging, transportation, and storage of electric door lock devices for automobiles. This standard applies to electric door lock devices for Category M1 and N1 automobiles that involve rotational, translational, or swinging movements around a hinge axis. Electric door lock devices for other vehicle types may refer to this standard for implementation.

Document data

International classification (ICS): 43.040.60.

Chinese classification (CCS): T26.

Supersedes the earlier edition QC/T 627-2013.
