1 Foreword

QX/T 132-2011 was issued by China Meteorological Administration on 7 June 2011 and has been in force since 1 November 2011.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 16 pages in English translation.

2 Scope Preview

This standard specifies the names and formats of observational data files for major atmospheric components such as greenhouse gases, aerosols, reactive gases, and ozone. This standard applies to greenhouse gas, aerosols, reactive gases, ozone and other major atmospheric components of the observation data acquisition, transmission, station storage and application.
