1 Foreword

QX/T 133-2011 was issued by China Meteorological Administration on 7 June 2011 and has been in force since 1 November 2011.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 35 pages in English translation.

2 Scope Preview

This standard specifies the classification and coding of various meteorological elements and their related information. This standard applies to the management of meteorological data in the collection, processing, storage, archiving and service of meteorological data.

QX/T 133-2011 is filed under Chinese Standard Classification A 47, in the field of general, standardization and metrology.

This catalogue holds 448 other QX/T standards without an ICS number.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 35 pages

Chinese original: about 52,590 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 124-2011 - Data classifying and coding for atmospheric composition observation

QX/T 123-2011 - Quality control for radiosonde data

5 Classification and status

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
