1 Foreword

QX/T 134-2011 was issued by China Meteorological Administration on 7 June 2011 and has been in force since 1 November 2011.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 11 pages in English translation.

2 Scope Preview

This standard specifies the turbulence field, mean field, visibility, particle size concentration below 10μm, atmospheric turbidity, atmospheric total suspended particulate matter concentration, dry deposition, soil moisture observation data file naming and file format The This standard is applicable to the storage, statistics, application and archiving of dust storm observation data.
