1 Foreword

QX/T 228-2014 was issued by China Meteorological Administration on 25 July 2014 and has been in force since 1 December 2014.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the level and division of regional high temperature weather processes. This standard applies to the monitoring, evaluation and forecasting of regional hot weather processes.

QX/T 228-2014 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.
