1 Foreword

QX/T 23-2004 was issued by China Meteorological Administration on 20 October 2004 and has been in force since 1 February 2005.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 9 pages in English translation.

2 Scope Preview

This standard specifies the rotating wind sensor (hereinafter referred to as wind sensor) technical requirements, test methods, inspection rules and packaging, marking and so on. This standard applies to digital output, digital automatic observing wind measurements used in sensor development, production and product acceptance. Other uses rotary wind sensor can refer to use.

QX/T 23-2004 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 9 pages

Chinese original: about 13,196 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 30-2021 - Technical specifications for lightning protection in automatic weather stations

QX/T 18-2020 - Specification for inspection of 37mm anti-aircraft gun used in weather modification operation

QX/T 16-2020 - Temperature and humidity meter verification box

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
