1 Foreword

QX/T 29-2004 was issued by China Meteorological Administration on 1 November 2004 and has been in force since 1 April 2005.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the groove mercury barometer technical requirements, test methods, inspection rules, marking, packaging, transportation and storage and so on. This standard applies to determination of meteorological stations and the relevant departments of atmospheric pressure groove mercury barometer (hereinafter referred to as dynamic slot table).

QX/T 29-2004 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 7 pages

Chinese original: about 10,175 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 37-2020 - Data file format for historical evolution of meteorological stations

QX/T 31-2018 - Specifications for assessing and accepting the completed meteorological construction project

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
