1 Foreword

QX/T 379-2017 was issued by China Meteorological Administration on 9 June 2017 and has been in force since 1 October 2017.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the data requirements, monitoring indicators and discriminating quotation marks used by meteorological satellite remote sensing to monitor the onset of the South China Sea summer monsoon. This standard applies to the use of meteorological satellites to monitor the onset of the South China Sea summer monsoon.

QX/T 379-2017 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.

In this catalogue, QX/T standards carry edition years from 2001 to 2026.

3 About this standard

Issued by: China Meteorological Administration

English translation: about 7 pages

Chinese original: about 10,133 characters

4 Related standards

Standards on related subjects:

GB/T 33679-2017 - Technical safety requirements of rocket production for rainfall enhancement and hail suppression

GB/T 33673-2017 - Grade of horizontal visibility

DZ/T 0175-2014 - Specifications for Geological Mapping of Coal (1:50000 1:25000 1:10000 1:5000)

QX/T 372-2017 - Grades of acid rain and acid rain area

QX/T 371-2017 - Index of atmospheric blocking high

5 Classification and status

International classification (ICS): 07.060

Chinese Standard Classification (CCS): A 47

Prefix QX/T: recommended standard.
