1 Foreword

QX/T 383-2017 was issued by China Meteorological Administration on 9 June 2017 and has been in force since 1 October 2017.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 12 pages in English translation.

2 Scope Preview

This standard specifies the indicators, calculation methods and grades of corn drought risk assessment. This standard applies to the risk assessment of corn drought disasters.

QX/T 383-2017 falls under ICS 07.060, in the field of natural and applied sciences.

This catalogue holds 269 other QX/T standards in that field.
