1 Foreword

QX/T 387-2017 was issued by China Meteorological Administration on 30 October 2017 and has been in force since 1 March 2018.

The QX/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 15 pages in English translation.

2 Scope Preview

This standard specifies the composition of the weather satellite data file name and the definition of the information field. This standard applies to the management of data reception, processing, storage, archiving and distribution services at all levels of meteorological satellites.

QX/T 387-2017 falls under ICS 07.060, in the field of natural and applied sciences.
